

# TESCORP INLET FILTRATION SYSTEMS

## APPLICATIONS:

- Positive Displacement Blowers
- Reciprocating Compressors
- Rotary Vane Compressors
- Rotary Screw Compressors

## *Features & Specifications:*

- » High filtration efficiency of 99% @ Paper = 2 micron, Polyester = 5 micron
- » Long filter life
- » Several elements available at a given connection size providing a choice according to air flow and the severity of your application
- » Tubular silencing design to maximize sound attenuation and air flow while minimizing pressure drop, 10-15 inch, H<sub>2</sub>O Delta P
- » Durable carbon steel construction with baked enamel finish
- » Interchangeable elements: Polyester, Paper HEPA
- » Pressure drop graphs available upon request
- » Temp: min-15 (-26 C), max 220 F (104 C)
- » Typical noise attenuation up to 15 dB's
